Dr. Joshua Lederberg
Department of Genetics
University of Wisconsin
Madison, Wisconsin

Dear Dr. Lederberg:

Many thanks for sending me the collection of reprints. Your continuous high productivity is really amazing.

I spent the day at Oak Ridge yesterday and feel that I profitted immensely from my visit with the Neurospora group. I plan to apply for the Research Participation Program for this summer. Applications for Research Associate positions for 1957-58 are no longer being accepted, but I may apply for the following year if all goes well this summer.

I appreciate your mentioning my name to Dr. G.W. Keitt as a possibility for his Venturia group. However, I have declined this offer because of the temporary nature of the assignment as well as the intention of doing further Neurospora work as I have just mentioned.

Best regards to Esther.

Sincerely yours,

Branch Howe
